gate lip hydraulics under sluice gate - fileirp - this paper present the effect of the lower gate lip on the coefficient of contraction, velocity and discharge which have been made in a rectangular flume with four gates opening from (2 to 4.5) cm, five different discharges from (6.2 to **sluice gates, roller gates, and tainter gates** - tainter gates - history & origin •tainter gates were invented in 1886 by jeremiah burnham tainter •he was an employee of knapp, stout, and co. a large lumber company based in wisconsin •mr tainter was tasked with producing a floodgate that could be easily opened and closed for applications in river lumber transport **estimation of flow discharge under the sluice and radial ...** - estimation of flow discharge under the sluice and radial gates based on contraction coefficient* ... decreases as the gate lip angle and the gate opening increase. under submerged flow conditions, the contraction coefficient of sluice and radial gates would be either increased or decreased **contraction coefficients for radial and sluice gates in ...** - for larger gate openings, the flow drops below the gate lip and passes through the opening as weir flow if there is insufficient tailwater to prevent critical flow through the gate opening. however, submergence can keep the gate in the water at a ... radial gates, utilizing laboratory data to develop and test the concept. **hydraulic downpull studies of the fixed-wheel spillway ...** - hydraulic downpull studies of the fixed-wheel spillway gates for red bluff diversion dam central valley project, california hydraulics branch report no. hyd-511 division of research office of chief e ngineer denver, colorado april 25, 1963 **19.0 gates, operators, and control systems 19.1 ... - alberta** - 19.0 gates, operators, and control systems 19.1 gates 19.1.1 general ... (moment of inertia), avoiding operation of the gate at that particular opening, or limiting the ... for small radial gates, the trunnion support assembly typically consists of a side pivot weldment **universal gate kit - timbertech** - • gates should always swing away from the stairs when opening. • be sure to install on a post that is plumb; this is critical for the gate to operate properly. • installation is easiest with two people. • gate should be installed with composite balusters only. universal gate kit **stop gates & stop logs - whipps** - series 500 stop gates the stop gates illustrated in this section are the types most commonly used. rugged aluminum construction is combined with tough, flexible ultra high molecular weight polyethylene (uhmw) scats/seals. this design achieves a very low level of leakage. stop gates can also be supplied in a similar rugged stainless steel design. **discharge correlations for spillways with radial gates** - gate opening, g , may be indicated by the vertical distance between the gate lip and the spillway surface, g_v ; or by the minimum, or normal-to-the-spillway surface, distance between the gate lip and the spillway surface, g_n . gate position may be indicated by the vertical opening above the crest centerline, v , by g , or by angle β or ϕ .
